

Bachelor of Science: Environmental Science (878)

Environmental Life Science Track

2019-2020

65 hours

The B.S. Environmental Science major will include two curricular paths for students, one with a life science emphasis and the other with an earth science emphasis. The program will enable students to prepare for a graduate program in the environmental sciences or to directly enter industry in the public or private sector. All students will have a common core of courses providing a foundation in biology and geosciences, and will also be required to take part in a capstone research project.

NOTES:

- Must have a UNI cumulative and a UNI major/Plan GPA of 2.50 or higher, with a grade of C- (1.67) or higher in all courses that are applied to the major.
- A minimum of 7 credits of 4000 biology electives required. BIOL4198 Independent Study and CHEM4510 Biochemistry do not count toward 4000 level biology elective requirement. At least 4 credits of 4000 level biology electives need to be taken at UNI.
- Cannot count more than a **combined 4 credits** to biology electives requirement.
 - BIOL 3185 Readings in Biology
 - BIOL 3190 Undergraduate Research
 - BIOL 4198 Independent Study
- If *CHEM 1130 General Chemistry I-II, 5 hrs, is taken, then 3 additional biology electives (or other electives approved by the Biology Department Head) are required to reach a 68 credit major.
- Courses noted with * indicate additional pre-requisites may be needed before taking the course
